Everflon™ Fluoropolymers

Responsible Chemistry. Reliable Materials. Regulatory Transparency.

1. Regulatory Reference

Regulation (EC) No 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), particularly Articles 57, 59 and 33, as applicable.

Reference: European Chemicals Agency (ECHA) Candidate List of Substances of Very High Concern (SVHCs) for Authorisation.

Candidate List Reference Date: 4 February 2026

2. Scope of Products

This declaration is intended for the specified Everflon™ fluoropolymer grades listed in the approved product schedule, which may include:

- Polytetrafluoroethylene (PTFE)
- Fluorinated Ethylene Propylene (FEP)
- Perfluoroalkoxy Polymer (PFA)
- Ethylene Tetrafluoroethylene (ETFE)
- Polyvinylidene Fluoride (PVDF)
- Other specifically designated fluoropolymer grades

Only individually verified products are covered by the final declaration.

3. SVHC Compliance Assessment

Everflon™ recognises the importance of chemical substance transparency and responsible supply-chain management.

For the identified products, applicable SVHC information is assessed against the referenced ECHA Candidate List using verified formulation information, available supplier declarations and relevant supporting documentation.

Based on the assessment of product composition, relevant supplier information and available supporting documentation, Everflon™ hereby declares that all fluoropolymer grades listed in this declaration comply with the applicable requirements concerning Substances of Very High Concern (SVHCs) under Regulation (EC) No 1907/2006 (REACH), with reference to the ECHA Candidate List dated 4 February 2026.

Where applicable, Everflon™ provides information intended to support customers in evaluating their responsibilities under REACH.

4. Regulatory Threshold and Communication

Under REACH Article 33, suppliers of articles containing a Candidate List SVHC above 0.1% by weight are subject to applicable information communication requirements.

The classification of the supplied product as a substance, mixture or article must be considered when determining relevant obligations.

The 0.1% threshold does not constitute a general exemption from all REACH requirements.

5. Declaration Scope and Limitations

This declaration relates exclusively to the grades identified in the approved product schedule and to their original condition of supply.

Additional processing, incorporation of additives, colouring, compounding or conversion into finished articles may require a separate SVHC assessment.

The statement does not imply that all fluoropolymers are free of every substance regulated under REACH or other applicable legislation.
